OCTOBER/ NOVEMBER 2011

ADDRESSING THE NEEDS OF INDIVIDUAL CUSTOMERS
AND PLANTING THE P FOR PRIDE IN OUR WORK.

There is a strong sense of urgency in changing the way we guide our people

FOCUS

Microfiber Cleaning & Training

Microfiber cleaning cloths are an invention which make less toxic cleaning infinitely easier. Microfiber cloths clean, dust and polish without using use of any cleaning chemicals. The cloths are made of tiny wedge shaped fibers, up to 100 times finer than a human hair. The tiny fibers grab and hold dirt. They are long lasting and re-usable.

- In the kitchen, use microfiber for cleaning counters and stovetops. The tiny fibers pick up more dirt and food residue than most cloths.

- In the bathroom, microfiber can clean tub, sink and shower stall surfaces.

- Dusting is easy with microfiber. The little fibers trap dust so that it stays in one place instead of flying around. When the job is finished, shake the cloth outside, or rinse in luke-warm water and hang to dry

- Floors can be washed with microfiber mops. The most common have flat-surfaced, easy to remove microfiber heads. Andorra Building Maintenance began the use of multicolored microfiber cloths to avoid cross contamination.

By December 2010 all locations were in full

utilization of the cloths. Our employees have been trained to identify and use the color chart to enhance cleaning.

A DIRTY JOB ITS OUR TERRITORY!

LET US HELP YOU

On October 6, 2011 we would be pleased to do a complimentary wax of a space (300Sqft) of your choice.
